Description: 25 East Dr, Amherst, MA

| Quantity | Item ID | Description  | Unit       | Amount     |
|----------|---------|--|------------|------------|
| 1.00     | MOVE    | <p>Wolfe House Movers:</p> <p>To move a 36'x59' (overall) 1 story triple brick schoolhouse and its concrete slab floor. To move the house roughly 1/2 mile to a new permanent location. To lift the house with a Unified Jacking System and move the house with the Buckingham Power Dolly System. To set the house exactly 8' above the new footings so the foundation can be built up to the supported masonry walls and grouted in. To provide the materials, labor and equipment for the move. To put holes in the foundation and excavate as necessary for installing the lifting &amp; moving equipment. To obtain the DOT permits required to move the house. No engineering, masonry, carpentry, utility work or permanent steel included.</p> <p>Customer:</p> <p>To clean out the basement/crawlspace ahead of time including the removal of all pipes, plumbing, ductwork, etc.. that hang below the floor joists and unfastening the sill plate from the foundation. To remove the blacktop all around the building ahead of time. To excavate down 3' below the joists and taper the grade 25' back away from the building ahead of time. To provide a clear move route including tree trimming, traffic control, excavation and utility line removal. To have the new foundation excavated and the footers poured with a ramp excavated ahead of time. The haul route and foundation ramp is to be 1"/ft (8%) grade or less with a softer transition at the top and bottom of any slope. To build the foundation up between the lifting steel and grout it in to the supported masonry walls.</p> <p>This price is an ESTIMATE only and will be finalized once a final location and move route is decided. This price is only valid if DOT permits can be acquired for moving the house according to Wolfe House Movers' normal means and methods.</p> | 150,000.00 | 150,000.00 |

**Proposal is valid until August 14, 2015**
